*Note: Make 4 copies of each sheet so that there are 4 of each numeral. However, only keep one 'Happy Apple' in order to play the game. Remind players to hold their cards so that the apples are on the bottom. Divide the cards evenly among all players (2-4). Children look in their hand for numerals that match and lay them out in front of them, saying the name of each numeral. Take turns drawing one card from each other's hand and seeing if they have a new match. Continue until all cards are gone, except the Happy Apple card. The person holding the Happy Apple wins!*

Happy Apple !
